JAN PAUWEL GILLEMANS

Garland with Fruits

This refined still life by Jan Pauwel Gillemans presents a sumptuous garland of fruits suspended against a dark background, a format closely associated with the Flemish Baroque tradition.

Grapes, peaches, figs, lemons and red currants are rendered with remarkable naturalism, their textures and colours heightened by the artist's sensitive handling of light. The composition is both harmonious and theatrical, with the cascading arrangement creating a sense of abundance and elegance.

Gillemans, celebrated for his meticulously detailed fruit pieces, combines decorative richness with a subtle sense of realism.
